MTTC Platform Meeting, December 16, 2009

Better Info than the Gold Standard

Polarized Elastic

Scattering

Spectroscopy (PESS)

Tabletop Console, Disposable Probe

Millions of Patients

Americans with colo-rectal cancer

 New cases of GI & and bladder cancer worldwide each year

Colonoscopies performed in the
 U.S. each year

A Biopsy Revolution

Excisional Biopsy

Optical Biopsy

Market Opportunity: \$500M+

Hospitals Reduce Costs, Risks, Patient Anxiety, and Patient Outcomes

	Conventional Biopsy	PESS
Non-Invasive?		
Unlimited sampling?		
Risks of infection/ perforation?		
Reduced procedure time and patient anxiety?		
Elimination of pathology lab costs?		
Improvement of diagnostic accuracies?		

Making Polypectopy More Profitable

Preventing Re-Surgeries and Suits: Instant Surgical Margin Assessment

Negative (Clear) Margins

Positive Margins

or

Instrumentation at Advanced Stage

SBIRs

- Technology development
- Human study in bladder

<u>Subcontracts</u>

- Boston University Colon study
- Boston University Head/neck cancer study
- BIDMC Barrett's esophagus study

<u>Sales</u>

• 12 systems sold to researchers

Strong IP Position

Clearance	
Issued Patents	
Filed Patents	
Inlicensing Discussions	

The Short Track to Liquidity

48 36 24 60 **MONTHS** 12 Product Development Lidiidity it clinical study clearance

The Optimum Stage to Invest

TOTAL NEW FUNDING NEEDED: \$11.5M

How We'll Spend the \$\$\$

- □ IP, Technology & Product Development
- Market Research & Development
- □ Regulatory & Reimbursement
- ☐ General Management
- Pivotal Human Study
